Main accomplishments in 2005

Conducted a total of 16 Labs (2 hours each) with approximately 50 students at each lab. Six of the labs were land navigation, while ten were tactics. Activities occur in many areas of the Preserve but usually start and end at Frautschi Point.

Additionally, 60 students and 5 faculty members worked on a 6 hour project to remove invasive species and clear deadwood, under the guidance of the Preserve Field Manager.
