NOTE: Letters in parentheses (left column of the following list) indicate map units that include deposits or materials of two or more genetic categories.

SURFICIAL DEPOSITS

GLACIAL DEPOSITS (TILL)

Till of late Wisconsin and Holocene(?) age ¹	
Clayey till	Ground-moraine deposits
tc	
End-moraine deposits	
td	
Loamy till	Ground-moraine deposits
tl	
End-moraine deposits	
tm	
Stagnation-moraine deposits	
tn	
Flood-scoured till	
to	
Sandy till	Ground-moraine deposits
ts	
End-moraine deposits	
tt	
Clayey to sandy till	
(tq)	Collapsed till and glacial-lake deposits
(tg)	Till, ice-contact deposits, glacioluvial deposits, and glaciolacustrine deposits of late Wisconsin and Illinoian age
Till of Illinoian age	
ta	Clayey to loamy till
Loamy till	
tk	Ground-moraine deposits
tj	End-moraine deposits
tf	Loamy till of Illinoian and pre-Illinoian age
Till of pre-Illinoian age	
tp	Clayey to loamy till
th	Clayey to sandy till
tb	Loamy till
(tr)	Discontinuous till, discontinuous glacioluvial deposits, and concentrations of erratic boulders and cobbles

GLACIOTECTONIC DEPOSITS

ta	Surficial deposits, surficial materials, and bedrock masses that were deformed and (or) transported intact by glacial ice
----	---

LACUSTRINE (LAKE) DEPOSITS

Detailed Glacial Limits

Source: [U.S. Geological Survey](#)

- Limit of glacial advance—Dashed where inferred.
Hachures point in direction of glaciated area
- Late Wisconsin—Southern limit of glaciation during Late Wisconsin time, 35,000–11,150 yr ago
 - Illinoian—Southern limit of glaciation during Illinoian time, 310,000–128,000 yr ago
 - Illinoian or pre-Illinoian—Southern limit of glaciation during Illinoian or pre-Illinoian time, earlier than 128,000 yr ago
 - Pre-Illinoian—Southern limit of glaciation prior to Illinoian time, earlier than 310,000 yr ago

Streams and Waterbodies

-  Aqueduct, Canal, Ditch, Intracoastal Waterway, or Stream
-  Bay, Estuary, or Ocean
-  Canal, Lake, Reservoir, or Stream
-  Dam
-  Dry Lake
-  Glacier
-  Intermittent Lake or Reservoir
-  Swamp or Marsh
